EDUCATION

University of California, Los Angeles (GPA: 3.92)

Exp. Fall 2025

B.S. Statistics and Data Science, Minor in Computer Science

Los Angeles, CA

Relevant Coursework: Python, Data Science, Data Analysis, Databases and SQL, Statistical Models & Data Mining, Machine Learning, Data Structures, Algorithms, GenAI with LLM's, Computational Stats with R, Optimization, Experimental Design, Probability, Linear Algebra

EXPERIENCE

Gale Visa

Sep. 2025 – Present

Data Engineer Consultant

Los Angeles, CA

- Leveraged efficient AI workflow to automate webscraping of 1 million+ rows of immigration data; modeled a relational database of several tables to store data in usable, clean format.
- Deployed Docker image into Railway and connected it to a PostgreSQL database for querying, enabling streamlined data analysis to reveal business insights.
- Blueprinting RAG-based Q&A chatbot as non-technical interface with the database to broaden user base.

UCLA Dept. of Medicine Statistics

Jan. 2025 – Dec. 2025

Data Engineer

Los Angeles, CA

- Built a cloud-based dashboard in RStudio to integrate genomic data and participant demographics from 21 studies, streamlining Alzheimer's research into a central hub; used GitHub for version control.
- Validated REDCap database branching logic and data access groups in accordance with technical guidelines and experimental design scheme for research in stroke treatment; used advanced Excel functions and macros.

Kickback

Apr. 2025 – Jun. 2025

Data Analyst Consultant

Los Angeles, CA

- Queried SQL database of e-commerce analytics to monitor website KPIs, identifying UX bottlenecks and bot engagement.
- Designed and deployed metric-driven A/B tests, bringing conversion rates up from 0.3% to 3% in two months.

PROJECTS

DataFest Hackathon 2024 & 2025 | RStudio, Tableau

Apr. 2025

- Assembled pipelines to clean and merge datasets totaling 300,000+ rows of student website interaction data in RStudio; conducted EDA and statistical tests to identify pain points in student performance and engagement.
- Built dashboard of student performance and web KPIs in Tableau, translating bottleneck analysis into actionable insights for non-technical reps.
- Analyzed geospatial real estate data to design heatmaps in Tableau, uncovering location-based trends for non-technical reps.

Spotify Data Analysis | SciKit-Learn, TensorFlow

Sep. 2024 – Dec. 2024

- Monitored and solved NN overfitting with dropout and weight decay, improving test accuracy from 30% to 55%; tuned hyperparameters via grid search to improve to 60.4%.
- Visualized multicollinearity and variable distributions with Matplotlib to enable interpretation of final model parameters and transform variables based on model requirements.

Web Scraping & CNN Classification of Snakes | Selenium, Keras

Sep. 2024 – Dec. 2024

- Designed flexible Python scripts to webscrape and validate a data set of 3000+ snake images.
- Self-studied optimal layer architecture, image augmentation and dropout to achieve a 97.57% test accuracy CNN.

SKILLS

Languages: R/RStudio, Python, SQL, Linux/Unix/Bash, C++, LaTeX, JavaScript, HTML

Developer Tools: Docker, Databricks, Tableau, PostgreSQL, Git/GitHub, Excel, Visual Studio, Railway

Libraries: NumPy, Pandas, (ML) PyTorch, TensorFlow, Keras, SciKit-Learn, Tidymodels (Visualization) Matplotlib, Plotly, ggplot, (Misc) SciPy, Selenium, BeautifulSoup, Shiny

Soft Skills: Data communication, unafraid to ask questions, care for detail, mettle in fast-paced env, quick learner

Fun Stuff: Rock climbing outdoors, beachgoing, hosting friend hangouts, network theory
